PROFILE:

I'm a Gameplay Programmer with a passion for creating games. I enjoy creating gameplay systems, AI behaviours, tools, and mechanics that make games fun to play.

TEAM PROJECTS:

ANIMALS ON SET – GAME PROJECTS

February 2026 - June 2026

- C# in Unity.
- Developed gameplay systems for a local party game.
- Implemented ragdoll mechanics and player interactions.

COINHEIST – RETRO CONSOLE & EMULATOR PROGRAMMING

September 2025 - December 2025

- Created a two-player NES game using Assembly.
- Implemented and created the art and animation in the game.
- Fully working on the Mesen Emulator and on the real hardware.

SOLO PROJECTS:

ECOSYSTEM SIMULATION – ALGORITHMS 2

February 2026 - June 2026

- C# in Unity.
- Developed AI-driven ecosystem behaviours using Finite State Machines.

SLIM3 EDITOR

April 2026

- Developed an in-game level editor in Godot, allowing players to design and play their custom platforming levels.
- Implemented a level sharing system using unique level codes.
- Created all the assets myself.
